

Short Case Study – September 22

Very pleased to report our client Joseph moved into social housing this month. We have been working with Joseph since he became unwell in March 2021 and came to us because he was having trouble coping in his private accommodation, because of his health condition. At this point we helped him to apply to join the housing register, as well as helping him to apply for all of the benefits he was entitled to. He is currently settling in, and we are helping him to get set up and buy all of the things he needs for his new home, which is on a ground floor, and much more suitable to his needs.
